Habitudes, the Art of Connecting with Others (A Faith Based Resource) Tim Elmore, 2006-01-01 Book one begins this series with the subject of self-leadership. This addition to the series covers the art of connecting with others. It covers principles that deal with humility and servanthood, encouraging and building trust, listening and communication. HABITUDES is a breakthrough way to teach leadership principles, to a post-modern student. Loaded with thirteen images, this book in the series captures the art of leading others. Full color photographs throughout the book make it a keeper for students to use and to teach from after they have gone through it. Today's student is EPIC: Experiential, Participatory, Image-driven and Connected. See how Habitudes enables you to teach leadership in groups in an experiential and memorable way: using pictures and exercises. Very one of us influences those around us.

Disease Control Priorities, Third Edition (Volume 6) King K. Holmes, Stefano Bertozzi, Barry R. Bloom, Prabhat Jha, 2017-11-06 Infectious diseases are the leading cause of death globally, particularly among children and young adults. The spread of new pathogens and the threat of antimicrobial resistance pose particular challenges in combating these diseases. Major Infectious Diseases identifies feasible, cost-effective packages of interventions and strategies across delivery platforms to prevent and treat HIV/AIDS, other sexually transmitted infections, tuberculosis, malaria, adult febrile illness, viral hepatitis, and neglected tropical diseases. The volume emphasizes the need to effectively address emerging antimicrobial resistance, strengthen health systems, and increase access to care. The attainable goals are to reduce incidence, develop innovative approaches, and optimize existing tools in resource-constrained settings.

Designing Sound Andy Farnell, 2010-08-20 A practitioner's guide to the basic principles of creating sound effects using easily accessed free software. Designing Sound teaches students and professional sound designers to understand and create sound effects starting from nothing. Its thesis is that any sound can be generated from first principles, guided by analysis and synthesis. The text takes a practitioner's perspective, exploring the basic principles of making ordinary, everyday sounds using an easily accessed free software. Readers use the Pure Data (Pd) language to construct sound objects, which are more flexible and useful than recordings. Sound is considered as a process, rather than as data—an approach sometimes known as “procedural audio.” Procedural sound is a living sound effect that can run as computer code and be changed in real time according to unpredictable events. Applications include video games, film, animation, and media in which sound is part of an

interactive process. The book takes a practical, systematic approach to the subject, teaching by example and providing background information that offers a firm theoretical context for its pragmatic stance. [Many of the examples follow a pattern, beginning with a discussion of the nature and physics of a sound, proceeding through the development of models and the implementation of examples, to the final step of producing a Pure Data program for the desired sound. Different synthesis methods are discussed, analyzed, and refined throughout.] After mastering the techniques presented in Designing Sound, students will be able to build their own sound objects for use in interactive applications and other projects

The Mushroom at the End of the World Anna Lowenhaupt Tsing, 2017-09-19 What a rare mushroom can teach us about sustaining life on a fragile planet Matsutake is the most valuable mushroom in the world—and a weed that grows in human-disturbed forests across the northern hemisphere. Through its ability to nurture trees, matsutake helps forests to grow in daunting places. It is also an edible delicacy in Japan, where it sometimes commands astronomical prices. In all its contradictions, matsutake offers insights into areas far beyond just mushrooms and addresses a crucial question: what manages to live in the ruins we have made? A tale of diversity within our damaged landscapes, *The Mushroom at the End of the World* follows one of the strangest commodity chains of our times to explore the unexpected corners of capitalism. Here, we witness the varied and peculiar worlds of matsutake commerce: the worlds of Japanese gourmets, capitalist traders, Hmong jungle fighters, industrial forests, Yi Chinese goat herders, Finnish nature guides, and more. These companions also lead us into fungal ecologies and forest histories to better understand the promise of cohabitation in a time of massive human destruction. By investigating one of the world's most sought-after fungi, *The Mushroom at the End of the World* presents an original examination into the relation between capitalist destruction and collaborative survival within multispecies landscapes, the prerequisite for continuing life on earth.

The Urban Sketcher Marc Taro Holmes, 2014-10-28 Make the world your studio! Capture the bustle and beauty of life in your town. Experience life as only an artist can! Join the rapidly growing, international movement of artists united by a passion for drawing on location in the cities, towns and villages where they live and travel. Packed with art and advice from Marc Taro Holmes, artist and co-founder of Urbansketchers.org, this self-directed workshop shows you how to draw inspiration from real life and bring that same excitement into your sketchbook. Inside you'll find everything you need to tackle subjects ranging from still lifes and architecture to people and busy street scenes. • 15 step-by-step demonstrations cover techniques for creating expressive drawings using pencil, pen and ink, and watercolor. • Expert tips for achieving a balance of accuracy, spontaneity and speed. • Practical advice for working in the field, choosing subjects, coping with onlookers, capturing people in motion and more. • Daily exercises and creative prompts for everything from improving

essential skills to diverse approaches, such as montages, storytelling portraits and one-page graphic novels. Whether you are a habitual doodler or a seasoned artist, *The Urban Sketcher* will have you out in the world sketching from the very first page. By completing drawings on the spot, in one session, you achieve a fresh impression of not just what you see, but also what it feels like to be there . . . visual life stories as only you can experience them.

The Oxford Handbook of Sleep and Sleep Disorders Charles M. Morin, Colin A. Espie, 2012-03 A great deal of progress has been made in the characterization assessment and treatment of sleep disorders in recent years. Detailing the functions of sleep and its effect on cognition and development, this book offers a comprehensive, practical approach to the evaluation and treatment of patients with sleep disorders.

A Patriot's History of the United States Larry Schweikart, Michael Patrick Allen, 2004-12-29 For the past three decades, many history professors have allowed their biases to distort the way America's past is taught. These intellectuals have searched for instances of racism, sexism, and bigotry in our history while downplaying the greatness of America's patriots and the achievements of "dead white men." As a result, more emphasis is placed on Harriet Tubman than on George Washington; more about the internment of Japanese Americans during World War II than about D-Day or Iwo Jima; more on the dangers we faced from Joseph McCarthy than those we faced from Josef Stalin. *A Patriot's History of the United States* corrects those doctrinaire biases. In this groundbreaking book, America's discovery, founding, and development are reexamined with an appreciation for the elements of public virtue, personal liberty, and private property that make this nation uniquely successful. This book offers a long-overdue acknowledgment of America's true and proud history.

Burt Munro Neill Birss, 2016-06-13 Previously unpublished interviews with Burt Munro, legendary Kiwi motorcycle rider made famous in the movie *The World's Fastest Indian*. Colourful tales of a life well-lived. Invercargill, at the far southern end of New Zealand. It's the late 1960s and two blokes sit in a modest shed drinking tea. The old bloke is telling stories about his life; the young bloke, a junior reporter, is typing earnestly on his Olympia portable typewriter. Dramatic tales abound - of youthful scrapes, motorcycle races and ingenious repairs, of international travel and friendships and road trips, of high speeds and accidents and meetings with dutiful policemen. Burt Munro became known around the world through the 2005 movie *The World's Fastest Indian*, but had long been known to motorcycle fans as a colourful character and speed record-holder. Our young journalist, Neill Birss, moved away from Invercargill and the interviews he had typed out were never published. In fact, they were lost during the move and only resurfaced under strange circumstances many decades later. Here they are in this book - the lost interviews with Burt Munro, legendary Kiwi motorcycle rider - his voice as fresh and his stories as vivid as the day he told them to the young reporter.

Data Information Literacy Jake Carlson, Lisa R. Johnston, 2015-01-15 Given the increasing attention to managing, publishing, and preserving research datasets as scholarly assets, what competencies in working with research data will graduate students in STEM disciplines need to be successful in their fields? And what role can librarians play in helping students attain these competencies? In addressing these questions, this book articulates a new area of opportunity for librarians and other information professionals, developing educational programs that introduce graduate students to the knowledge and skills needed to work with research data. The term data information literacy has been adopted with the deliberate intent of tying two emerging roles for librarians together. By viewing information literacy and data services as complementary rather than separate activities, the contributors seek to leverage the progress made and the lessons learned in each service area. The intent of the publication is to help librarians cultivate strategies and approaches for developing data information literacy programs of their own using the work done in the multiyear, IMLS-supported Data Information Literacy (DIL) project as real-world case studies. The initial chapters introduce the concepts and ideas behind data information literacy, such as the twelve data competencies. The middle chapters describe five case studies in data information literacy conducted at different institutions (Cornell, Purdue, Minnesota, Oregon), each focused on a different disciplinary area in science and engineering. They detail the approaches taken, how the programs were implemented, and the assessment metrics used to evaluate their impact. The later chapters include the DIL Toolkit, a distillation of the lessons learned, which is presented as a handbook for librarians interested in developing their own DIL programs. The book concludes with recommendations for future directions and growth of data information literacy. More information about the DIL project can be found on the project's website: datainfoilit.org.

Curing the Dread of Death Rachel E. Menzies, Ross G. Menzies, Lisa Iverach, 2018-08-30 The dread of death has appeared throughout recorded human history in art, literature, song, myth, and ritual. In both ancient and modern societies, the spectre of death has always been with us, stalking the terrified living who seek to avoid its inevitable arrival. Our attempts to respond to the finitude of life range from ancient burial customs such as mummification to computerised chatbots which imitate the personality of those who have departed. Such efforts speak to the uniqueness of humans in their awareness of their own mortality. Yet death is not to be feared. Indeed, it may hold the key to living a vital, authentic life. The many authors of this volume argue persuasively that we cannot live fully without complete acceptance of the fragility and finiteness of life. This unique book explores the dread of death and its management from a wide range of perspectives with researchers and writers from a variety of cultures, academic traditions and disciplines across the globe. The fields covered are broad — including palliative care and grief, psychodynamic theory, social, developmental and clinical psychology, sociology and anthropology, counselling practice as well as history, art, and philosophy. Not only is this book a fascinating journey into the very core of the human psyche, it is also a guide to our psychological health. The challenge we all face is to discover

pathways to an acceptance of death that enables a life of significance and meaning. Read, learn, and explore what an examination of the dread of death can bring to one's life.

Neuroimaging of Sleep and Sleep Disorders Eric Nofzinger,Pierre Maquet,Michael J. Thorpy,2013-03-07 An up-to-date, superbly illustrated practical guide to the effective use of neuroimaging in the patient with sleep disorders. The only book to date to provide comprehensive coverage of this topic. A must for all healthcare workers interested in understanding the causes, consequences and treatment of sleep disorders.

On Being Human Calvin Seerveld,2019-09-23 This is not just another book of meditations. This is a book which promises to engage all of your senses while vividly illustrating what it really means to be human. Through the use of scripture, stunning artworks, original songs and prayers, the author explores the miracle of being human, in the image of God. This is not just a series of Bible-study lessons or a devotional exercise to begin or round off the day: --The songs included are for singing; --The artworks are for imaginative viewing; --The scripture translations and prayers are meant to be read aloud and heard. This book is meant to be used humanly. It is meant to be enjoyed in the living presence of God, as a listening, sinful saint, sharing its truth with neighbors.

DIRT [Danger Ideation Reduction Therapy] for Obsessive Compulsive Washers Tamsen St.Clare,Ross G. Menzies,Mairwen K. Jones,2008 Unlike many traditional OCD treatments, DIRT is based on the rationale that the therapist should provide as much factual information as possible to decrease the expectancy of illness or disease and thus reduce the high dropout rate seen in conventional OCD exposure and response prevention programs.

Plants of the Pacific Northwest Coast Andy MacKinnon,Jim Pojar,Paul B. Alaback,2004 The classic authority on plants of the Pacific Northwest.

The History Boys Alan Bennett,Nicholas Hytner,2006 Now a major motion picture from Fox Searchlight Pictures, The History Boys: The Film contains Alan Bennett's diary of the filming, the shooting script, and an introduction by director Nicholas Hytner, as well as an extensive plate section that includes a look behind the scenes and stills from the film. An unruly bunch of bright, funny sixth-form (or senior) boys in a British boys' school are, as such boys will be, in pursuit of sex, sport, and a place at a good university, generally in that order. In all their efforts, they are helped and hindered, enlightened and bemused, by a maverick English teacher who seeks to broaden their horizons in sometimes undefined ways, and a young history teacher who questions the methods, as well as the aim, of their schooling. In The History Boys, Alan Bennett evokes the special period and place that the sixth form represents in an English boy's life. In doing so, he raises not only universal questions about the nature of history and how it is taught but also questions about the purpose of education today.

Interactive Aerospace Engineering and Design Dava J. Newman,2002 This text contains an integrated bound-in CD-ROM, and has a strong emphasis on design. Its active visual approach and inclusion of space-orientated engineering make it

an interesting examination of the aerospace engineering field.
