Your Camera Loves You Khara Plicanic, 2011-08-04 Wait-what!?! You're not thrilled with the photos you're getting from your digital camera? The answer isn't a new camera—it's learning to use the one you've got! After all, it's not the camera that takes great photos—it's the person behind it. With *Your Camera Loves You: Learn to Love it Back*, photographer and instructor Khara Plicanic teaches the basics of photography and digital camera functions that you can apply to any camera, anywhere, any time—answering questions like: What do all those different modes mean and when do I use them? What's a megapixel and why should I care? Follow along with Khara's simple explanations of shutter speed, aperture, and shooting modes to get comfortable handling your camera (even bossing it around a bit!), learn to shoot images that tell a story, and understand the thought process involved in making a great photograph. Along the way you'll learn techniques for improving those yellow dingy photos of your kids' indoor sporting events, fixing exposure on shots that are too dark or too bright, avoiding the dangers of over-cropping, and much more. By the time you're finished, you'll know how to best use the features of whatever camera you already have—whether it's a high-performance DSLR or a basic point-and-shoot camera. Get ready to fall in love with your camera (and photography) all over again! With *Your Camera Loves You*, you will: • Move beyond "Auto" mode to take advantage of more of your camera's features and settings • Discover that the key to getting great images isn't by using a fancy DSLR but by learning your way around whatever camera you have • Learn from Khara's fun, friendly voice and techno-babble-free explanations how to easily improve your photos And as you learn, share your progress by posting your photos at flickr.com/groups/yourcameralovesyou/.

A European Public Investment Outlook Floriana Cerniglia, Francesco Saraceno, 2020-06-12 This outlook provides a focused assessment of the state of public capital in the major European countries and identifies areas where public investment could contribute more to stable and sustainable growth. A European Public Investment Outlook brings together contributions from a range of international authors from diverse intellectual and professional backgrounds, providing a valuable resource for the policy-making community in Europe to feed their discussion on public investment. The volume both offers sector-specific advice and highlights larger areas which should be prioritized in the policy debate (from transport to social capital, R&D and the environment). The Outlook is structured into two parts: the chapters of Part I respectively explore public investment trends in France, Germany, Italy, Spain and Europe as a whole, and illuminate how the legacy of the 2008 Global Financial Crisis is one of insufficient public investment. Part II investigates some areas into which resources could be channelled to reverse the recent trend and provide European economies with an adequate public capital stock. The essays in this outlook collectively foster a broad approach to and definition of public investment, that is today more relevant

than ever. Offering up a timely and clear case for the elimination of bias against investment in European fiscal rules, this outlook is a welcome contribution to the European debate, aimed both at policy makers and general readers.
