Preparing Collections for Digitization Anna Bülow, Jess Ahmon, Ross Spencer, 2011 Most libraries, archives and museums around the globe are now confronting the challenges of providing digital access to their collections. As digitization becomes more widespread, there is huge demand for detailed guidance on best practice. While much has been written on the theory, these practical aspects have often been neglected, but they are significant not only in safeguarding the collection during image capture but also in ensuring that projects run smoothly and the resulting digital collection is of high quality. This practical guide fills that gap, offering guidance covering the end-to-end process of digitizing collections, from selecting records for digitization to choosing suppliers and equipment and dealing with documents that present individual problems. As such, it can be used as a 'how-to' reference manual for collection managers who are embarking on a digitization project or

who are managing an existing project. It also covers some of the wider issues such as the use of surrogates for preservation, and the long term sustainability of digital access. Key areas covered are: - digitization in the context of collection management - before you digitize: resources, suppliers and surrogates - the digital image - the process of selection - surveying collections - equipment for image capture - preparation of document formats and fastenings - preparation of damaged documents - setting up the imaging operation. Readership: A clearly-written guide to a complex process, this book is an essential resource for all collection and project managers who have responsibility for the preservation of archival collections, as well as all industry professionals whose role touches on the digitization of collections.

The Dead Moms Club Kate Spencer, 2017-11-21 Kate Spencer lost her mom to cancer when she was 27. In The Dead Moms Club, she walks readers through her experience of stumbling through grief and loss, and helps them to get through it, too. This isn't a weepy, sentimental story, but rather a frank, up-front look at what it means to go through gruesome grief and come out on the other side. An empathetic read, The Dead Moms Club covers how losing her mother changed nearly

everything in her life: both men and women readers who have lost parents or experienced grief of this magnitude will be comforted and consoled. Spencer even concludes each chapter with a cheeky but useful tip for readers (like the It's None of Your Business Card to copy and hand out to nosy strangers asking about your passed loved one).

Multibiometric Watermarking with Compressive Sensing Theory Rohit M. Thanki, Vedvyas J. Dwivedi, Komal R. Borisagar, 2018-01-02 This book presents multibiometric watermarking techniques for security of biometric data. This book also covers transform domain multibiometric watermarking techniques and their advantages and limitations. The authors have developed novel watermarking techniques with a combination of Compressive Sensing (CS) theory for the security of biometric data at the system database of the biometric system. The authors show how these techniques offer higher robustness, authenticity, better imperceptibility, increased payload capacity, and secure biometric watermarks. They show how to use the CS theory for the security of biometric watermarks before embedding into the host biometric data. The suggested methods may find potential applications in the security of biometric data at various banking applications, access control of laboratories, nuclear power stations, military base, and airports.
