Dig & Dig Deep Richard Arnold,2013-03-09

American Photography Vicki Goldberg,Robert Silberman,1999 This beautiful and informative photographic history includes images from 1900 to 1999. Many are often seen (bullet piercing the apple, splashing crown of milk, Sophia Loren looking askance at Jayne Mansfield's plunging decollete, and Dorothea Lange's Migrant Mother); but most are probably unknown, because the photos were selected not only for their visual and cognitive qualities but also for their importance to the history and development of photographic technique and usage. The century is divided into thirds for explanation's sake, and there is at least one photograph for every year. While this is a picture book, the accompanying text provides informative introductions to the uses and abuses of perhaps the century's most important medium. The book is companion to the PBS series. Transforming Images Barbara E. Savedoff, 2000 The author seeks to discern the distinctive character of photography as an art, asking why similar images affect us differently and how our reaction to a photograph of a painting is different to the response to the painting. She demonstrates perceived realism and the transformation of images.

Great Images of the 20th Century Kelly Knauer, 1999 Presents pictures of the major events of the twentieth century involving business, disasters, society, sports, the arts and more.

Encyclopedia of Image Processing Phillip A. Laplante, 2018-11-08 The Encyclopedia of Image Processing presents a vast collection of well-written articles covering image processing fundamentals (e.g. color theory, fuzzy sets, cryptography) and applications (e.g. geographic information systems, traffic analysis, forgery detection). Image processing advances have enabled many applications in healthcare, avionics, robotics, natural resource discovery, and defense, which makes this text a key asset for both academic and industrial libraries and applied scientists and engineers working in any field that utilizes image processing. Written by experts from both academia and industry, it is structured using the ACM Computing Classification System (CCS) first published in 1988, but most recently updated in 2012.

High-Quality Visual Experience Marta Mrak, Mislav Grgic, Murat Kunt, 2010-09-08 Last few years have seen rapid acceptance of high-definition television (HDTV) technology around the world. This technology has been hugely successful in delivering more realistic television experience at home and accurate imaging for professional applications. Adoption of high definition continues to grow as consumers demand enhanced features and greater quality of content. Following this trend, natural evolution of visualisation technologies will be in the direction of fully realistic visual experience and highly precise imaging. However, using the content of even higher resolution and quality is not straightforward as such videos require significantly higher access bandwidth and more processing power. Therefore, methods for radical reduction of video bandwidth are crucial for realisation of high visual quality. Moreover, it is desirable to look into other ways of accessing visual content, solution to which lies in innovative schemes for content delivery and consumption. This book presents selected chapters covering technologies that will enable greater flexibility in video content representation and allow users to

access content from any device and to interact with it.

The JPEG and Image Data Compression Algorithms Manyun Zhang, 1990 Abstract: A set of still image compression algorithms JPEG (Joint Photographic Experts Group) is becoming an international standard. Here we investigate the algorithms and explore why these algorithms were chosen by JPEG among many other comparable algorithms. We also present our results, observations and analysis on simulating the JPEG sequential baseline system. Based on our simulator, a comparison of Huffman coder, arithmetic coder and LZW algorithm is also included.

Digital Codicology Bridget Whearty, 2022-11-15 Medieval manuscripts are our shared inheritance, and today they are more accessible than ever—thanks to digital copies online. Yet for all that widespread digitization has fundamentally transformed how we connect with the medieval past, we understand very little about what these digital objects really are. We rarely consider how they are made or who makes them. This case study-rich book demystifies digitization, revealing what it's like to remake medieval books online and connecting modern digital manuscripts to their much longer media history, from print, to photography, to the rise of the internet. Examining classic late-1990s projects like Digital Scriptorium 1.0 alongside

late-2010s initiatives like Bibliotheca Philadelphiensis, and world-famous projects created by the British Library, Corpus Christi College Cambridge, Stanford University, and the Walters Art Museum against in-house digitizations performed in lesser-studied libraries, Whearty tells never-before-published narratives about globally important digital manuscript archives. Drawing together medieval literature, manuscript studies, digital humanities, and imaging sciences, Whearty shines a spotlight on the hidden expert labor responsible for today's revolutionary digital access to medieval culture. Ultimately, this book argues that centering the modern labor and laborers at the heart of digital cultural heritage fosters a more just and more rigorous future for medieval, manuscript, and media studies.

GoLive 5 Visual Insight David A. Crowder, Rhonda Crowder, 2001 *GoLive 5 Visual Insight* teaches the most useful features of this emerging product released to compete with Macromedia Dreamweaver. Readers go straight to work on learning how to create their own Web sites by learning basic GoLive features such as working with text, applying images, and applying advanced features such as forms, tables, and dynamic HTML. Over 20 real world projects let readers apply their knowledge first hand by creating various elements of a Web site. Like all Visual Insight books, this book appeals to visual learners who need to see - rather than read - how to create something. Its unique format allows readers to see an effect in the book and then duplicate it on their screen. Unlike other small sized books, *GoLive 5 Visual Insight* features a 16-page color section that illustrates color related tasks and project results.

The Dead Moms Club Kate Spencer, 2017-11-21 Kate Spencer lost her mom to cancer when she was 27. In *The Dead Moms Club*, she walks readers through her experience of stumbling through grief and loss, and helps them to get through it, too. This isn't a weepy, sentimental story, but rather a frank, up-front look at what it means to go through gruesome grief and

come out on the other side. An empathetic read, *The Dead Moms Club* covers how losing her mother changed nearly everything in her life: both men and women readers who have lost parents or experienced grief of this magnitude will be comforted and consoled. Spencer even concludes each chapter with a cheeky but useful tip for readers (like the *It's None of Your Business Card* to copy and hand out to nosy strangers asking about your passed loved one).
