You will first become familiar with the MATLAB environment, and then you will begin to harness the power of MATLAB. You will learn the MATLAB language, starting with an introduction to variables, and how to manipulate numbers, vectors, matrices, arrays and character strings. You will learn about MATLAB's high-precision capabilities, and how you can use MATLAB to solve problems, making use of arithmetic, relational and logical operators in combination with the common functions and operations of real and complex analysis and linear algebra. You will learn to implement various numerical methods for optimization, interpolation and solving non-linear equations. You will discover how MATLAB can solve problems in differential and integral calculus, both numerically and symbolically, including techniques for solving ordinary and partial differential equations, and how to graph the solutions in brilliant high resolution. Ceramic Transfer Printing Kevin Petrie,2021-12-09 The ultimate guide to the potential of ceramic transfer printing as a creative medium. This book is ideal for anyone wishing to combine ceramics with print and transfers, a very exciting area which has enormous scope for creativity. Ceramic transfers or decals are one of the prime methods of decorating industrially-made ceramics. They also offer exciting creative potential for studio-based artists or designer-makers. A ceramic transfer is traditionally made by printing ceramic ink onto a special paper and allows pictures, patterns or text to be transferred onto ceramic forms - 2D and 3D. Importantly, print can achieve distinct aesthetic effects on ceramics that are not possible by using other decoration methods such as hand painting. Drawing on over twenty years of experience, Kevin Petrie offers a focused analysis of the potential of ceramic transfer printing as a creative medium. Discover the specific materials and techniques for making versatile screen-printed ceramic transfers - from the 'low tech' to the more sophisticated. In this book, you can also explore other approaches by artist researchers as well as recent developments with digital transfers. A range of case studies shows the potential and diversity of the transfer printing approach in this area, which extends beyond ceramics to include printing on enamel, metal and glass.

Dare to Make History Jocelyne Lamoureux-Davidson,Monique Lamoureux-Morando,2021-02-23 Dare to Make History is the story of two courageous and talented women who weren't willing to accept anything less than being treated as equals. On their journey to a gold medal in women's ice hockey, they became role models for generations before and after them. Twins

Jocelyne Lamoureux-Davidson and Monique Lamoureux-Morando started playing ice hockey with their four older brothers and their friends on a frozen pond next to their home in North Dakota. No girls hockey teams, no problem—they just played on boys teams. They went on to win six World Championships and played in three Olympics, winning two silver medals and ultimately a gold medal in South Korea in 2018 for the USA Women's National Team. They did not allow roadblocks and discrimination deter them from taking on their governing body—USA Hockey—threatening to boycott the 2017 World Championships and jeopardizing their ability to compete in the 2018 Olympics unless their gender equity issues were addressed. The success of Monique, Jocelyne, and their team thrust them into the center of the struggle for gender equity, for women in hockey and in sports in general, as well as in society at large. In Dare to Make History, the Lamoureux twins chronicle their journey to the pinnacle of their sport, their efforts along with almost 150 other hockey players to start a new professional women's hockey league, their training to come back and make another national team after giving birth, their tireless efforts to advance the interests of disadvantaged communities in closing the digital divide, and their ongoing contributions as role models championing the dreams of future generations of girls in sports, education, and the workplace. This is not a hockey book. It is not a girls book. It is a book about the importance of the fight for equity, particularly gender equity. It is the inspirational story of how two young women from a small town in North Dakota have dreamed big—had the courage to take on huge battles—and in the end how they have dared to make history.

Fingerprints and Other Ridge Skin Impressions Christophe Champod,Chris J. Lennard,Pierre Margot,Milutin Stoilovic,2017-12-19 Since its publication, the first edition of Fingerprints and Other Ridge Skin Impressions has become a classic in the field. This second edition is completely updated, focusing on the latest technology and techniques—including current detection procedures, applicable processing and analysis methods—all while incorporating the expansive growth of literature on the topic since the publication of the original edition. This book addresses these questions with a clear viewpoint as to where the profession—and ridge skin identification in particular—must go and what efforts and research will help develop the field over the next several years. The second edition introduces several new topics, including Discussion of ACE-V and research results from ACE-V studies Computerized marking systems to help examiners produce reports New probabilistic models and decision theories about ridge skin evidence interpretation, introducing Bayesnet tools Fundamental understanding of ridge mark detection techniques, with the introduction of new aspects such as nanotechnology, immunology and hyperspectral imaging Overview of reagent preparation and application Chapters cover all aspects of the subject, including the formation of friction ridges on the skin, the deposition of latent marks, ridge skin mark identification, the detection and enhancement of such marks, as well the recording of fingerprint evidence.
