XSLT Doug Tidwell,2001 Have you ever needed to convert documents from XML to HTML ? Or from one XML vocabulary to another ? Extensible Stylesheet Transformations (XSLT) provide a critical bridge between XML processing and more familiar HTML, as well as between XML vocabularies. XSLT demonstrates how to use this powerful, but complex, tool for a wide variety of conversions. Examples illustrate many different cases and techniques, giving you working code to explore and modify for your own purposes. Originally created for page layout, XSLT has grown into one of the tore technologies used by most developers processing XML. Through clear and entertaining explanations, this book shows you how to use XSLT as a general-purpose translation tool, a system for reorganizing document content, and a tool for generating multiple results (including HTML, VRML, and SVG) from the same content. Though XSLT is extremely useful, it can also be daunting to new users. XSLT uses an XML-based template syntax combined with a terse vocabulary called XPath that identifies how the template applies to the original document. The understanding of variables in XSLT is very different from the understanding of variables in procedural languages, for instance. Getting started with XSLT is difficult, and advanced techniques require a thorough understanding of how XSLT templates work and interact with one another. XSLT brings it all together, giving developers both a thorough tutorial and a reference. It examines both XSLT and XPath, a critical companion standard, and explores subjects ranging from basic transformations to complex sorting and linking. In addition, the book explores extension functions on various XSLT processors and how to combine multiple documents with XSLT. Examples demonstrate all of the techniques described. Examples also illustrate how to use XSLT to generate a ride variety of target document types, including HTML, SVG, JPEG, Java source code, and XSLT stylesheets.

Secrets of Seduction: The Powerful Influence of Behavioral Psychology Applied to Seduction and Persuasion Paulo Roberto de Sá Araújo,2021-10-02 Recent surveys reveal that about 84% of men feel insecure in flirting situations: whether due to lack of courage, fear of judgment, feeling intimidated by the beauty of women, not knowing what to say or even because of an ingrained shyness. This is because these men do not understand the psychological aspects and mental triggers that are behind any human interaction. In my teens, I was very shy and embarrassed to talk to women who piqued my interest, until I discovered that seduction and conquest skills could be learned and I could really become a skilled seducer if I learned the right techniques. After studying human behavior a lot and even graduating from courses on influence and persuasion, I became an expert in communication and finally understood how some men conquer women so easily, as if they

were true magnets and attracted them to themselves with very little effort. Thinking about helping other men to overcome these difficulties I wrote the book "Secrets of Seduction", where I teach all the powerful techniques of influence, persuasion, NLP and seduction that really changed my life. I literally reveal all the secrets you've never been told about relating to women. In it, I teach practical strategies from basic to advanced to overcome any mental block, gain self-confidence, interpret signals of interest and, just by looking, know exactly who are the women who are interested in you. I also approach the best communication techniques with an almost hypnotic power to create connections, which helped me not only in the seduction aspect but also in several areas of my life. I hope this book adds the same value to you as it did to me.

Inspiring Beauty Chicago History Museum,2013 The Ebony Fashion Fair began in 1958, and over the next 50 years the traveling fashion show blossomed into an American institution that raised millions for charity and helped Johnson Publishing Company reach audiences. Show organizers overcame racial prejudice to bring the pinnacle of Europe's premier fashion to communities that were eager to see, in real time and space, a new vision of black America that was the hallmark of Ebony

and Jet magazines. Eunice Johnson took over as producer and director in 1963, and under her direction, the traveling show took on new heights as she expanded her cachet and power within fashion circles. Inspiring Beauty: 50 Years of Ebony Fashion Fair recreates the experience of the Ebony Fashion Fair through the story of Mrs. Johnson and more than 60 garments from icons of the fashion industry such as Yves St. Laurent, Oscar de la Renta, Pierre Cardin, Emanuel Ungaro, Christian Lacroix, and Patrick Kelly among others.

The Last Pictures Trevor Paglen,2012-09-19 Human civilizations' longest lasting artifacts are not the great Pyramids of Giza, nor the cave paintings at Lascaux, but the communications satellites that circle our planet. In a stationary orbit above the equator, the satellites that broadcast our TV signals, route our phone calls, and process our credit card transactions experience no atmospheric drag. Their inert hulls will continue to drift around Earth until the Sun expands into a red giant and engulfs them about 4.5 billion years from now. The Last Pictures, co-published by Creative Time Books, is rooted in the premise that these communications satellites will ultimately become the cultural and material ruins of the late 20th and early 21st centuries, far outlasting anything else humans have created. Inspired in part by ancient cave paintings, nuclear waste warning signs, and Carl Sagan's Golden Records of the 1970s, artist/geographer and MacArthur Genius Fellow Trevor Paglen has developed a collection of one hundred images that will be etched onto an ultra-archival, golden silicon disc. The disc, commissioned by Creative Time, will then be sent into orbit onboard the Echostar XVI satellite in September 2012, as both a time capsule and a message to the future. The selection of 100 images, which are the centerpiece of the book, was influenced by four years of interviews with leading scientists, philosophers, anthropologists, and artists about the contradictions that characterize contemporary civilizations. Consequently, The Last Pictures engages some of the most profound questions of the human experience, provoking discourse about communication, deep time, and the economic, environmental, and social uncertainties that define our historical moment. A Mathematical Primer for Social Statistics John Fox,2021-01-11 A Mathematical Primer for Social Statistics, Second Edition presents mathematics central to learning and understanding statistical methods beyond the introductory level: the basic language of matrices and linear algebra and its visual representation, vector geometry; differential and integral calculus; probability theory; common probability distributions; statistical estimation and inference, including likelihood-based and Bayesian methods. The volume concludes by applying mathematical concepts and operations to a familiar case, linear least-squares regression. The Second Edition pays more attention to visualization, including the elliptical geometry of quadratic forms and its application to statistics. It also covers some new topics, such as an introduction to Markov-Chain Monte Carlo methods, which are important in modern Bayesian statistics. A companion website includes materials that enable readers to use the R statistical computing environment to reproduce and explore computations and visualizations presented in the text. The book is an excellent companion to a math camp or a course designed to provide foundational mathematics needed to understand relatively advanced statistical methods.
